CSCE 606 - NXTFOLIO, Iteration 4 (Draft)

Team roles:

Ahmed Tanvir Mahdad (Scrum Master)
Md Mojibur Rahman Redoy Akanda
Homa Pesarakli (Product Owner)
Alex Chin
Surya Krishnan

Client: FashionNXT (Tito Chowdhury)

Required items for submission:

1- Select and work on a quarter of user stories submitted for iteration).

2- Create a set of cucumber and RSpec test cases for each implemented user story.

3- Design Diagram of current entities and relationships in the app.

4- Implement user stories and make sure that test cases can be run automatically.

5- Deploy to Hetoku, Demo for Customer and obtain customer feedback.

* Place all of the following in a tar file (Word file for text documents):

Customer meeting date to demo this iteration.

User stories implemented in this iteration.

Design diagram for this iteration.

Any additional documentation related to the user stories, e.g. changes to lo-fi UIs.

If you were not able to implement all the stories that you initially chose for this iteration, please list which ones and why not.

If you have changed any of your stories, please write a short description of the changes made and the reason behind the changes.

If you are working on a legacy project, please list any user stories that were rewritten and code refactored.

Evaluations of your code and tests, such as SimpleCov and CodeClimate

Meeting with client

On April 22nd, we met with the client to show him our progress with the user stories for iteration 4. We showed him the progress on the expanding navigation bar on the home page, the progress on DM's and notifications, the progress on deleting a user's galleries as well as the gallery display pages, and the progress on the rating systems.

On April 26th, we met with the client to show him our finished user stories for iteration 4. We displayed the expanding navigation bar to him as well as the completed DM's and notifications. We discussed finishing the rating system, as well as integrating the separate branches into the main branch. The client also gave us some feedback on the mobile view of each page. Finally, he gave us his thoughts on some of the small changes he would like to see for some of the features before the May 1st deadline if possible.

Completed User Stories
User Story 7:
➢ **Description**: The navigation bar for the different types of professionals on the home page expands horizontally when the arrow is clicked, and vice versa.

User Story 11:
➢ **Description**: Professionals can see the notifications (e.g., tag request) when they are logged in into their NxtFolio profile.

User Story 12:
➢ **Description**: A professional can send direct messages to other professionals.

User Stories added in this iteration
Based on our discussion with the client we added

User Story -21:
➢ **Description**: Making sure the navigation bar adjusts with screen size and looks presentable in the mobile phone view. The bar should not wrap to the next row but should be in one row and be scrollable for the user.
➢ This user story is created upon the client request.

User Story 22:
- ➢ **Feature**: All projects will be shown on the home page instead of profile
- ➢ As a professional user, I would like to see the projects and project pictures instead of profiles in the home page.

User Story 23:
- ➢ **Feature**: Pagination added on Home page projects
- ➢ As a professional user, I would like to see a certain number of projects in each page and when I scroll down, it will automatically load projects from the next page.

User Story 24:
- ➢ **Feature**: City level search should be added on search algorithm
- ➢ As a professional user, I would like to see profiles from my city first in the search results.

User Story 25:
- ➢ **Feature**: Forget Password feature needs to be implemented
- ➢ As a professional user, I would like to reset my password when I forget.

Behavior Driven Development
