Feature: Make profile-preview images on homepage larger so that there are only 3 displayed per row

> As an application user,
>
> So that I can see each profile-preview image more clearly, the page is less crowded, and there is less whitespace,
>
> I want to click on each profession category and have it display 3 profile-preview images in each row.

Scenario: Get overview of professionals in each category
> Given I am on the Homepage of NXTFolio App
> When I click on a category
> It only shows 3 images with larger area and with less whitespace.

Feature: Design Profile Data entry page as per specification (Slide -8 in NXTFolio Web app presentation)

> As an application user,
>
> So that my profile page displays information about me such as profile picture, a cover photo, my contact links, profession, etc.,

Scenario: Create profile in NXTFolio in usable (as per specification) way
> Given I am on the Homepage of NXTFolio App
> When I click on "Register your Business"
> It will redirect me to the new profile data entry page.
> I can provide personal profile information on page 1 and can navigate to page 2 (professional details).
> I can provide professional details information on page 2 and save it and land on the profile details page after saving.

Feature: Change profile page to have less whitespace and display 3 project galleries in each row of the gallery display section.

      As an application user

      So that I can see other professionals' previous projects & works,

      I want to click on a professionals profile and see 3 galleries displayed per row of the gallery display section, as well as less white space in between each gallery.

Scenario: When the users search for a professional and land on the profile details page.
      Given I have landed on a profile detail page after searching for a professional.
      When I see the detail page, it should contain at most 3 image on the page as representative projects
      It will also show reduced whitespace between section (as per slide 8)

==
User Story – 4
==

Feature: Each gallery contains at most 5 photos.

      As an application user,

      So that I can display my project in a concise manner from different angles,

      I want to upload at most 5 photos to each project and receive an error whenever I attempt to create a gallery with more than 5 photos.

Scenario: When the add a project
      Given I am creating my profile and adding my projects
      When I save the project with more than 5 photos, an error message will be shown to upload 5 photos or less.

Feature: Clicking on a professional's gallery opens a small menu where the pictures can be scrolled through.

>   As an application user,

>   So that I can easily view the images in a professional's gallery,

>   I want to click on a gallery preview in a professional's gallery display, and have a small menu open where I can click on left and right arrows that allow me to scroll through all of the pictures in a gallery.

Scenario: When going to a project detail page of a professional
>   Given I am searching for a professional and visiting the project detail page
>   When I open the project detail page, I should see the image in larger size and can show all images they have listed.

Feature: The navigation bar for the different types of professionals on the home page expands horizontally when the arrow is clicked, and vice versa.

As an application user,

So that I can see all the categories under a certain group of professionals (e.g., creators, service, makers) on the home page,

I want to click on the ">>" button located next to the navigation bar of a certain group of professionals and have all type of professionals under that category to be displayed horizontally, covering the rest of the categories of professionals until the "<<" button is pressed again.

Scenario: When Clicking on the "<<" button on the right side of group
Given I am a professional or searching for professionals in a group
When I click on the "<<" button, other groups will be hidden and all categories under this group will be shown.

Feature: A professional can tag another professional as a collaborator in their project

     As a professional and application user

     So that I can tag another professional in my project and promote their work,

     I want to write "@(professional's handle)" in the description of my project, and be able to click on the handle to navigate to that professional's profile page.

Scenario: When writing "@" in the description,
     Given I am a professional and adding other professionals in a project.
     When writing '@' in the description, it would show a suggestion of people that I can add as a collaborator.

Feature: Professionals can see the notifications (e.g., tag request) when they are logged in into NxtFolio profile
      As a professional and application user
      So that I can see all the notifications sent to me while I am logged into the application.

      I want to see all my important notifications in a single place when I log in.

Scenario: When a professional logged into their profile, they can see the number of notifications in the notification icon.
      Given I am a professional and trying to see all my notifications that are important to address.
      When I log into my profile, I can see the notification icon is highlighted if there are unread notifications for me. After clicking on the highlighted notification icon, it should show me the list of notifications. I do not want to see the highlighted notification button when there is no new notification.

==
User Story -12
==

Feature: A professional can send direct messages to other professionals in NXTFolio
      As a professional and application user
      So that I can communicate with other professionals by direct messages.

      I want to send direct messages to other professionals and see my inbox for incoming messages.

Scenario: When a professional clicks message option in other professionals profile
      Given I am a professional and trying to communicate with other professionals
      When I click on the 'Direct Message' button, a text box will appear to me and I can type and send messages to the professionals. I can also see my messages on the 'Inbox' link of my profile.
